WORK EXPERIENCE

Travelling Website

| 2022 - Present

- Collaborated with team members to design and implement a responsive and user-friendly front-end interface for the travel website, resulting in a visually appealing and intuitive user experience.
- Front-End Excellence: Focused on the front-end of the website, honing in on the critical components that users interact with directly, such as the user interface and design aesthetics.

E-Commerce Website

Elexio: A Shopping Experience Like Amazon | 2023-Present

- Implemented responsive front-end development with HTML, CSS, and JavaScript, ensuring an intuitive and visually appealing user interface to enhance the shopping experience.
- **Enhanced User Experience:** Focused on creating an intuitive and visually appealing shopping environment on Elexio, mirroring the success of Amazon's approach, and thereby increasing user satisfaction

Auto Profile Generator

Application | 2023 -Present

- Auto Profile Generator App (Hackathon Project)Technology Stack: Flutter and Java
- Description: Developed an Auto Profile Generator App during Hackathon that automatically generates user profiles based on specified criteria. The app was built using Flutter for the frontend and Java for backend logic.
